EXECUTIVE PROFILE

I am pursuing Advanced Management Program in Business Analytics from ISB. My interest lies broadly in the area of traditional Machine Learning or Deep Learning use cases.

At McKinsey, I am working in the HR domain with a focus on digital transformation and automation of HR practices within the firm.

Prior to joining McKinsey, I have deep experience in managing end to end life cycle of a digital product both in B2C and B2B segment.

Besides work, I love to spend time with my friends & family, I am a voracious reader and keep learning new things. My curiosity led me to undertake an expedition to Antarctica with Sir Robert Swan, OBE (first person in the history to walk to both the poles) on climate change.
